

Dr. Peter Kovacs, Dunamenti REK IVF Center

Dr. Peter Kovacs graduated from the Albert Szent-Gyorgyi School of Medicine in Szeged, Hungary in 1994. He did his OB/GYN training and subspecialty training in Reproductive Endocrinology and Infertility in New York at the Albert Einstein College of Medicine. He successfully passed board exams in both OB/GYN and REI in the USA. Upon completion his training he moved back to Hungary and assumed a position at the Kaali Institute IVF center. In 2008 he was promoted to become the medical director of the center and he still serves as the medical director for the institute that is now called Dunamenti REK IVF Center. In 2005 he earned a PhD degree at the University of Pecs, Hungary for assessing the effect of diabetes/ insulin on GnRH neuron activity using a rat model and in 2024 successfully passed through the habilitation process at the same university. He serves on the Hungarian Human Reproduction Committee which is the highest regulating body of ART in Hungary. He is the vice president of the Hungarian ART Society. His current research interest focuses on ovarian reserve tests, stimulation options for IVF, predictors of IVF outcome and on various tools, including time-lapse technology that could be used to improve clinical outcome. He published 58 peer-reviewed papers and several book chapters; he was the co-editor of the first Hungarian textbook on infertility evaluation and treatment. He gave over 100 presentations at national and international meetings.
