Dr. Sciorio holds a degree in Science Biology with 110/110 cum laudem at University of Naples “Federico II”, and a master’s degree in science and biotechnology from Napier University Scotland. With more than 30 years of experience in assisted reproductive techniques, pre-implantation genetic testing and cryopreservation: he has worked within research and clinical embryology across Italy, France, England, Scotland, Australia, Canada, Armenia, India, Pakistan, Nepal, Middle East, and Switzerland. He is state registered clinical scientist (HCPC), holds an ICSI and embryo biopsy license. His current interests include embryo culture to the blastocyst stage, time-lapse technology, and vitrification. He is author and co-author of more than 60 peer-reviewed papers and been invited to present regularly at both national and international scientific meetings.
